

# CONGRATULATIONS TO THE PRESTON TEAM!

## Jenner's Pond has received a **5-STAR** rating as a Skilled Nursing Community

When it comes to our residents, there is no higher priority for us than their continued health and well-being. Whether it's through the food we prepare or the social activities we promote, we strive every day to ensure our residents enjoy a healthy and fulfilling lifestyle.

The Centers for Medicare and Medicaid Services (CMS) designates Skilled Nursing ratings to retirement communities across the country. Ratings are based on criteria like health inspections, community staffing, and quality measures. For instance, while most communities across the country will see just over half of their residents return home following a short stay, 60% of Jenner's Pond patients will elect to return home after success in their rehabilitation therapy. Because of impressive statistics like this, the Preston Residence at Jenner's Pond was awarded 5 stars due to its outstanding staff and scores that bested both Pennsylvania and national averages.

Our 5-Star rating by the numbers:

**36**

Certified beds at the  
Preston Residence
